**CANNON & CANNON, INC.** is pleased to present the 2018 Water and Sewer Utilities Rate Survey for the Commonwealth of Kentucky. We are proud to support and partner with the Kentucky Rural Water Association – KRWA – for this edition. Our hope is that you find the information contained herein useful.

The survey information reflects the data received and is presented in alphabetical order with the first section for water rates and the second section for sewer rates. Rate information for those utilities, identified with a one, two, or three, was obtained from the 2016 Kentucky Water & Sewer Rate Survey, the utilities' website, or the Water Resource Information System provided by the State, respectively. In addition, we have estimated the cost for an average residential customer consuming 5,000 gallons per month.

The chart at the beginning of the Water Rates section illustrates the distribution of the cost of 5,000 gallons over the 339 different water rate structures provided by the respondents to this survey. The chart at the front of the Sewer Rates section illustrates the distribution of the cost of 5,000 gallons of sewer based on the sewer rate structures of our respondents. There are 239 different sewer rate structures in this survey.

A summary of the average rates for 5,000 gallons of water and sewer used per month for the rate surveys conducted in 2012, 2016 and 2018 are shown below:

AVERAGE COST FOR 5,000 GALLONS (RESIDENTIAL)			
	2012	2016	2018
Water	\$33.77	\$37.66	\$39.75
Sewer	\$33.68	\$38.63	\$41.12

A special thanks to KRWA for help in the  
development of the rate survey.
